

How To Connect Your Devices

1. Android

For **Android**, start on your phone home page **(A)**, slide your finger from the top of your phone downwards to open the top bar menu **(B)** and select the settings button on the top right corner (gear icon ).

In here go to **“Connections” (C)** and then select **“Wi-Fi” (D)**. After selecting Wi-Fi, turn it on and you will see the Wi-Fi signals near your device **(E)**. In here search for **“optodorms” (F)**, put your username under **“Identity”** and your password under **“Password”** and in **“CA certificate”** select **“Don’t Validate”** and select **“Connect”**. Your android device should connect, if it did not connect please contact us at cit@opto.inter.edu

(E)

(F)

2. IOS\Apple

For **IOS** start on your phone home page **(A)** and slide from the bottom of your phone upwards to open up the menu **(B)**. In here, long press the Wi-Fi button  to open up a new menu **(C)** and long press the Wi-Fi button again to show the nearby signals **(D)**. In here search for **“optodorms”**.

(A)

(B)

(C)

(D)

In here (E) enter your credentials and press "Join". In the next screen (F), just press "Trust" to connect to the Wi-Fi.

3. Mac

From the desktop, go to the top bar and press the Wi-Fi icon , and select "Other Networks"(A). In here (B), search for "optodorms". Next enter your credentials (C) and then click on Continue (D).

(C)

A network login dialog box with a purple background. At the top is a white Wi-Fi icon. Below it, the text reads "Enter a name and password for network 'optodorms'". There are two input fields: "Account Name:" with the value "O00112233" and "Password:" with a masked password of seven dots. Red arrows point to the right of each input field. Below the fields is a checked checkbox labeled "Remember this information". At the bottom are two buttons: "Cancel" (purple) and "OK" (blue).

(D)

A "Verify Certificate" dialog box with a dark grey background. It features a yellow padlock icon with a Wi-Fi symbol. The text says "Authenticating to network 'optodorms'" and "Before authenticating to server 'ubuntu', you should examine the server's certificate to ensure that it is appropriate for this network." Below this, it says "To view the certificate, click 'Show Certificate'". At the bottom are three buttons: a question mark icon, "Show Certificate" (grey), "Cancel" (grey), and "Continue" (blue, circled in red).

Finally enter your Apple keychain credentials to connect to the Wifi (E).

(E)

An "eaptlstrust" dialog box with a dark purple background. At the top is a yellow padlock icon. Below it, the text reads "eaptlstrust" and "You are making changes to your Certificate Trust Settings." followed by "Enter your password to allow this." There are two input fields: an empty one and one with a masked password of four dots. At the bottom are two buttons: "Update Settings" (blue) and "Cancel" (purple).

4. Windows

For **Windows PC**, while in your desktop go to the taskbar section and click on  or  **(A)**. This will open up a menu **(B)** with the nearby Wi-Fi signals. In here search for “**optodorms**”. Next enter your credentials **(C)** to connect to the WiFi.
